

## CONTENTS

CONTENTS AND SYMBOLS .....	3
1. INTRODUCTION .....	11
2. EFFECT OF UNDERWATER EXPLOSION ON SHIP .....	19
2.1. Classification of impacts of underwater explosions on ship .....	22
2.1.1. Contact explosions .....	22
2.1.2. Close-field non-contact explosions .....	25
2.1.3. Far-field non-contact explosions .....	28
2.1.4. Explosion of mines under a general cargo vessel PLO m/s Józef Wybicki .....	29
2.2. Marine tests of underwater explosions on the ship .....	33
2.3. Sea mine threats on the world's reservoirs .....	41
3. DESCRIPTION OF UNDERWATER EXPLOSION .....	45
3.1. Description of the pressure wave for TNT explosion in water acc. to R.H. Cole .....	45
3.2. R.H. Cole formulas with W. Stepanov and J.S. Nawagin corrections .....	50
3.3. Description of explosion pressure wave acc. to Warren D. Reid .....	51
3.4. Description of explosion pressure wave acc. to T. L. Geers, K. S. Hunter .....	55
3.5. Summary and comparison of pressure wave models acc. to different authors .....	57
3.6. Duration of the pressure wave impact on the ship .....	62
3.7. The angle of incidence of the pressure wave on the ship .....	64
3.8. The value of pressure acting on the ship's hull .....	67
3.8.1. The value of pressure behind the front of regular reflected wave .....	68
3.8.2. The value of pressure behind the front of irregular reflected wave - Mach wave .....	73
3.8.3. The wave reflected from the bulkhead .....	74
3.8.4. The pressure wave reflected from water surface and surface cavitation .....	76
3.8.5. Pressure wave reflected from the bottom .....	80
3.9. Determination of pressure loading an object in water .....	83
3.10. JWL equation of state for TNT .....	85
3.11. UNDEX procedure .....	88
4. DESCRIPTION OF MATERIAL PROPERTIES IN NUMERICAL APPROACH .....	91
4.1. Elastic characteristics of material .....	92
4.2. True plastic characteristics of material .....	96
4.3. Plastic material characteristics as a function of strain rate .....	100
4.4. Plastic material characteristics in the Johnson-Cook model .....	102

4.5. Other material models .....	111
4.6. The "triaxiality" coefficients .....	114
4.7. Modeling of material failure .....	118
4.8. The Johnson-Cook failure model .....	122
<b>5. NUMERICAL INTEGRATION OF MOTION EQUATION IN FEM.....</b>	<b>125</b>
5.1. The method of central (finite) differences.....	126
5.2. Houbolt method .....	128
5.3. Newmark and Euler Method.....	129
5.4. Wilson method.....	131
<b>6. SHIP'S HULL GEOMETRY AND DISCRETIZATION .....</b>	<b>135</b>
6.1. Finite elements used for discretization of the ship's hull.....	137
6.2. Connecting finite elements of different types through connectors .....	140
6.3. Modeling of devices and equipment.....	143
<b>7. ACOUSTIC MEDIUM .....</b>	<b>149</b>
7.1. Equilibrium equations of acoustic medium.....	149
7.2. Boundary conditions.....	152
7.3. Modeling of the acoustic medium in CAE program .....	154
7.4. Defining an incident shock wave (acoustic forces) in acoustic medium .....	156
7.5. Discretization of the acoustic medium.....	157
<b>8. CALCULATION EXAMPLES .....</b>	<b>163</b>
8.1. Analysis of the strength of the ship's hull flat bottom .....	163
8.2. Strength analysis of the hull structure of the Kilo-class submarine .....	169
8.3. The impact of the pressure wave with reflection from the bottom on the ship's hull .....	188
<b>9. SUMMARY.....</b>	<b>203</b>
<b>BIBLIOGRAPHY .....</b>	<b>205</b>
<b>SOFTWARE AND LICENSES</b>	<b>212</b>
